

QQI level 2 Awards for Quantitative Problem Solving

On 10th March 2022 at the Avista Creative Hub, Tait Business Centre, Limerick.

Marie Ryan

Brian Mc Namara

Jimmy Murphy

Niall O Flanagan

Claire O Connor

received their QQI level 2 awards for Quantitative Problem Solving

Everyone was thrilled with their achievement.

Here are their experiences in their own words:

My Name is Mr Jimmy Murphy.

I did QQI level 2 Quantitative problem solving with my teacher Tracy during 2020 - 2021 lockdown, we worked on zoom.

I was at home. Mum and Dad saw the great work I was doing they said "well done Jimmy - great job".

Yesterday I was presented with my award. I feel great about that thing that I did. It put me in a good mood. I am totally proud of myself. I am working on "Setting Learning goals "and " Using Technology".

All good.

I worked hard on QQI level 2. Quantitative Problem Solving this was math's, addition, subtraction multiplication and division. I had a two-day service during the 2020 -2021 lockdown.

We did whole course on Zoom. I got print outs of the work. It worked well. I feel great about getting the award. My parents are delighted as well. It was hard work but it was good during the lock down. I was busy. We had a great celebration together. We had photos and chance to meet the class. There was a small party. I am working on "using technology" this is great. Zoom was great during the pandemic we are doing an extra class per week on Zoom still.

Niall O Flanagan. Rendu. TEES. Limerick

“I did QQI Level 2 Quantitative Problem Solving on zoom during corvid 19 lockdowns.

I did one class while in the Tait and one class at home.

I just received my certificate and I am happy with this.

I am now doing two modules with Tracy”.

Brian Mc Namara

“During lockdown we couldn’t go to our classes in person and we were at home in our houses. But we did find a way around this problem by doing our classes on Zoom on our computers. This was very new to us but we learned this new skill and became good at it. The worksheets were posted out to us so we’d have them to do in our zoom classes. Staff collected the finished sheets and got them back to Tracy our teacher. She then finished off our portfolios”-

Claire O Connor & Marie Ryan.
